Gear up a Great Office with the Gyrofile ...

Gyrofiles will help you think creatively on how to set out your office : you can use them against a wall, instead of a wall or partitioning, in an alcove ...

Gyrofiles are a favourite with space planners, facility managers, and architects who love the versatility and pleasing looks and feel of this unique product.

A base Gyrofile can be the anchor for a full line of Add-on Gyrofiles, that are less large than the base.

	Starter Unit mm	Add on Unit mm
Width	1184	969.5
Depth	798	798

Electroclass is an open, user friendly partner. Make suggestions to us, or ask our advice, and we will be delighted to talk. Some of our most attractive client sites have been defined with our clients or their advisors.

Clients in all industries, services and administrations, large and small, have taken to the GYROFILE. Ask us or one of our authorized dealers for advice and information.

ACUMEN for your Office Filing

Good Looks and Good Behaviour

Back to back filing allows you to reach two layers of filing without moving more than your arm – so it gives you faster access. In the Gyrofile, this is achieved by a frame on high quality ball-bearing, giving the smoothest, quietest operation.

Many accessories can fit into the Gyrofile – shelves for hanging or standing files, but also a pull-out reference shelf, pull-out cradles for hanging files, or a secure lockable drawer unit. Electroclass can tailor your units to fit your environment – not only by painting in special colours, but also by matching the wood panelling to your interior.

Best Use of Space and Time

A GyroFile is made up of two shelved storage areas that swivel, back to back, around a vertical axis. The mobile unit is mounted into the fixed cabinet. With a quarter turn, you bring forward the sides, that serve as the door of the cabinet.

A GyroFile swings easily from one position to the other, and stabilizes in an open or closed position. Beautifully simple design makes it most practical, even when hands are full with files. It will not ever jam or grip unduly.

With a Gyrofile, you get twice as many linear meters of storage along a wall. Since file storage is quite compact, your time to access the file will also come down.

The Gyrofile can be locked, and it features a number of different add-on accessories that can serve many different requirements: reading tablets, hanging or standing files, cardfiles, drawer
